

## DEPARTMENT OF REGULATORY AND ECONOMIC RESOURCES (RER) BOARD AND CODE ADMINISTRATION DIVISION

## MIAMI-DADE COUNTY PRODUCT CONTROL SECTION

11805 SW 26 Street, Room 208 Miami, Florida 33175-2474 T (786) 315-2590 F (786) 315-2599 www.miamidade.gov/economy

#### **NOTICE OF ACCEPTANCE (NOA)**

Polyglass USA, Inc. 150 Lyon Drive Fernley, NV 89408

#### SCOPE:

This NOA is being issued under the applicable rules and regulations governing the use of construction materials. The documentation submitted has been reviewed and accepted by Miami-Dade County RER - Product Control Section to be used in Miami Dade County and other areas where allowed by the Authority Having Jurisdiction (AHJ).

This NOA shall not be valid after the expiration date stated below. The Miami-Dade County Product Control Section (In Miami Dade County) and/or the AHJ (in areas other than Miami Dade County) reserve the right to have this product or material tested for quality assurance purposes. If this product or material fails to perform in the accepted manner, the manufacturer will incur the expense of such testing and the AHJ may immediately revoke, modify, or suspend the use of such product or material within their jurisdiction. RER reserves the right to revoke this acceptance, if it is determined by Miami-Dade County Product Control Section that this product or material fails to meet the requirements of the applicable building code.

This product is approved as described herein, and has been designed to comply with the Florida Building Code including the High Velocity Hurricane Zone of the Florida Building Code.

#### **DESCRIPTION:** Polyglass Modified Bitumen Roof System Over Recover Decks

**LABELING:** Each unit shall bear a permanent label with the manufacturer's name or logo, city, state and following statement: "Miami-Dade County Product Control Approved", unless otherwise noted herein.

**RENEWAL** of this NOA shall be considered after a renewal application has been filed and there has been no change in the applicable building code negatively affecting the performance of this product.

**TERMINATION** of this NOA will occur after the expiration date or if there has been a revision or change in the materials, use, and/or manufacture of the product or process. Misuse of this NOA as an endorsement of any product, for sales, advertising or any other purposes shall automatically terminate this NOA. Failure to comply with any section of this NOA shall be cause for termination and removal of NOA.

**ADVERTISEMENT:** The NOA number preceded by the words Miami-Dade County, Florida, and followed by the expiration date may be displayed in advertising literature. If any portion of the NOA is displayed, then it shall be done in its entirety.

**INSPECTION:** A copy of this entire NOA shall be provided to the user by the manufacturer or its distributors and shall be available for inspection at the job site at the request of the Building Official.

This revises NOA# 13-0416.02 and consists of pages 1 through 38. The submitted documentation was reviewed by Alex Tigera.

NOA No.: 13-1217.07 Expiration Date: 07/13/18 Approval Date: 10/16/14

Membrane: One ply of Polyflex, XtraFlex APP S, Polyflex G, Polyflex G FR, XtraFlex APP G, Polyfresko

G, XtraFlex Kool APP G, Polyfresko G FR, Polybond, Polybond G torch applied or one ply of Elastoflex S6 G, Elastoflex S6 G FR, XtraFlex SBS Poly G, Polyfresko G SBS, Polyfresko G

SBS FR, Elastoshield TSG or Elastoshield TSG FR torch or hot asphalt applied.

**Surfacing:** (Optional) Install one of the approved surfacing products listed in Table 4 to obtain desired

coating or required fire classification.

**Maximum Design** 

**Pressure:** -90 psf; (See General Limitation #7.)

NOA No.: 13-1217.07 Expiration Date: 07/13/18 Approval Date: 10/16/14 Page 29 of 38 Membrane Type: APP

**Deck Type 7:** Recover

**Deck Description:** <sup>19</sup>/<sub>32</sub>" or greater plywood or wood plank, fastened at 24" spans with #10 wood screws at 6" o.c.

at edges and intermediate supports. \*The deck should record a Minimum Characteristic Resistance Force (MCRF) of 66 lbf. when tested with fasteners, listed in this assembly,

installed through to the deck in accordance with TAS 105.

System Type E(9): Base sheet is mechanically attached to roof deck. Membranes subsequently adhered to

insulation.

All General and System Limitations apply. Roof accessories not listed in Table 1 of this NOA are not approved and shall not be installed unless said accessories demonstrate compliance with prescriptive Florida Building Code requirements and are field fabricated utilizing the approved membranes listed in Table 1.

**Base Sheet:** One ply of Polyglass APP Base or Polyglass G2 Base sheet fastened to the deck as described

below:

**Fastening:** Attach base sheet using OMG #12 Standard Roofgrip or OMG Heavy Duty fasteners with

OMG 3 in. Round Metal Plates or OMG Flat Bottom Metal Plates spaced 6" o.c. in a 4" lap and

6" o.c. in three equally spaced staggered center rows.

**Membrane:** One ply of Polybond G torch applied.

**Surfacing:** (Optional) Install one of the approved surfacing products listed in Table 4 to obtain desired

coating or required fire classification.

**Maximum Design** 

**Pressure:** -90.0 psf; (See General Limitation #7)

NOA No.: 13-1217.07 Expiration Date: 07/13/18 Approval Date: 10/16/14 Page 30 of 38

**Deck Type 7:** Recover

**Deck Description:**  $^{19}/_{32}$ " or greater plywood or wood plank, fastened at 24" spans with #10 wood screws at 6" o.c.

at edges and intermediate supports. \*The deck should record a Minimum Characteristic Resistance Force (MCRF) of 66 lbf. when tested with fasteners, listed in this assembly,

installed through to the deck in accordance with TAS 105.

**System Type** 

Base sheet is mechanically attached to roof deck. Membranes subsequently adhered to

E(10):

All General and System Limitations apply. Roof accessories not listed in Table 1 of this NOA are not approved and shall not be installed unless said accessories demonstrate compliance with prescriptive Florida Building Code requirements and are field fabricated utilizing the approved membranes listed in Table 1.

**Base Sheet:** One ply of XtraFlex SBS Glass Base, Elastobase (Sand/Poly) or Polyglass G2 Base sheet

fastened to the deck as described below:

**Fastening #1:** Attach base sheet using OMG #12 Standard Roofgrip or OMG Heavy Duty fasteners with

OMG 3 in. Round Metal Plates or OMG Flat Bottom Metal Plates spaced 6" o.c. in a 4" lap and

6" o.c. in three equally spaced staggered center rows.

**Fastening #2:** (Only with asphalt applied cap sheets) Attach base sheet using Trufast #12 DP or Trufast #14

HD fasteners and Trufast 3" Metal Insulation Plates spaced 6" o.c. in a 4" lap and 6" o.c. in

three equally spaced staggered center rows.

**Membrane:** One ply of Elastoflex S6 G torch or hot asphalt applied.

**Surfacing:** (Optional) Install one of the approved surfacing products listed in Table 4 to obtain desired

coating or required fire classification.

**Maximum Design** 

**Pressure:** -90.0 psf; (See General Limitation #7)

insulation.

NOA No.: 13-1217.07 Expiration Date: 07/13/18 Approval Date: 10/16/14 Page 31 of 38

**Deck Type 7:** Recover

**Deck Description:**  $^{19}/_{32}$ " or greater plywood or wood plank, fastened at 24" spans with #10 wood screws at 6" o.c.

at edges and intermediate supports. \*The deck should record a Minimum Characteristic Resistance Force (MCRF) of 93 lbf. when tested with fasteners, listed in this assembly,

installed through to the deck in accordance with TAS 105.

**System Type** 

Base sheet is mechanically attached to roof deck. Membranes subsequently adhered to

E(11):

insulation.

All General and System Limitations apply. Roof accessories not listed in Table 1 of this NOA are not approved and shall not be installed unless said accessories demonstrate compliance with prescriptive Florida Building Code requirements and are field fabricated utilizing the approved membranes listed in Table 1.

**Base Sheet:** One ply of XtraFlex SBS Glass Base or Elastobase (Poly/Poly, Sand/Sand) sheet fastened to the

deck as described below:

**Fastening:** Attach base sheet using Simplex MAXX Cap fasteners spaced 6" o.c. in a 2" lap and 6" o.c. in

two equally spaced staggered center rows.

**Membrane:** One ply of Polyflex G torch applied.

Or

One ply of Elastoflex S6 G, torch or hot asphalt applied.

**Surfacing:** (Optional) Install one of the approved surfacing products listed in Table 4 to obtain desired

coating or required fire classification.

Maximum Design

**Pressure:** -90.0 psf; (See General Limitation #7)

### **RECOVER SYSTEM LIMITATIONS:**

All System Limitations and General Limitations shall apply. See specific deck type Notice of Acceptance for deck type System Limitations.

NOA No.: 13-1217.07 **Expiration Date: 07/13/18** Approval Date: 10/16/14

Page 37 of 38

#### **GENERAL LIMITATIONS:**

- 1. Fire classification is not part of this acceptance; refer to a current Approved Roofing Materials Directory for fire ratings of this product.
- 2. Insulation may be installed in multiple layers. The first layer shall be attached in compliance with Product Control Approval guidelines. All other layers shall be adhered in a full mopping of approved asphalt applied within the EVT range and at a rate of 20-40 lbs./sq., or mechanically attached using the fastening pattern of the top layer
- 3. All standard panel sizes are acceptable for mechanical attachment. When applied in approved asphalt, panel size shall be 4' x 4' maximum.
- 4. An overlay and/or recovery board insulation panel is required on all applications over closed cell foam insulations when the base sheet is fully mopped. If no recovery board is used the base sheet shall be applied using spot mopping with approved asphalt, 12" diameter circles, 24" o.c.; or strip mopped 8" ribbons in three rows, one at each side lap and one down the center of the sheet allowing a continuous area of ventilation. Encircling of the strips is not acceptable. A 6" break shall be placed every 12' in each ribbon to allow cross ventilation. Asphalt application of either system shall be at a minimum rate of 12 lbs./sq.

#### Note: Spot attached systems shall be limited to a maximum design pressure of -45 psf.

- 5. Fastener spacing for insulation attachment is based on a Minimum Characteristic Force (F') value of 275 lbf., as tested in compliance with Testing Application Standard TAS 105. If the fastener value, as field-tested, are below 275 lbf. insulation attachment shall not be acceptable.
- 6. Fastener spacing for mechanical attachment of anchor/base sheet or membrane attachment is based on a minimum fastener resistance value in conjunction with the maximum design value listed within a specific system. Should the fastener resistance be less than that required, as determined by the Building Official, a revised fastener spacing, prepared, signed and sealed by a Florida registered Professional Engineer, Registered Architect, or Registered Roof Consultant may be submitted. Said revised fastener spacing shall utilize the withdrawal resistance value taken from Testing Application Standards TAS 105 and calculations in compliance with Roofing Application Standard RAS 117.
- 7. Perimeter and corner areas shall comply with the enhanced uplift pressure requirements of these areas. Fastener densities shall be increased for both insulation and base sheet as calculated in compliance with Roofing Application Standard RAS 117. Calculations prepared, signed and sealed by a Florida registered Professional Engineer, Registered Architect, or Registered Roof Consultant (When this limitation is specifically referred within this NOA, General Limitation #9 will not be applicable.)
- 8. All attachment and sizing of perimeter nailers, metal profile, and/or flashing termination designs shall conform to Roofing Application Standard RAS 111 and applicable wind load requirements.
- 9. The maximum designed pressure limitation listed shall be applicable to all roof pressure zones (i.e. field, perimeters, and corners). Neither rational analysis, nor extrapolation shall be permitted for enhanced fastening at enhanced pressure zones (i.e. perimeters, extended corners and corners). (When this limitation is specifically referred within this NOA, General Limitation #7 will not be applicable.)
- All membranes or packaging shall bear the imprint or identifiable marking of the manufacturer's name or logo and the following statement: "Miami-Dade County Product Control Approved" or the Miami-Dade County Product Control Seal as shown below.

MIAMI-DADE COUNTY
APPROVED

11. All products listed herein shall have a quality assurance audit in accordance with the Florida Building Code and Rule 61G20-3 of the Florida Administrative Code.
